XB10 Weathertron[®] Heat Pump

Beat The Summer Heat And Winter Cold.

An XB10 Weathertron® Heat Pump is an efficient way to cool your home in the summer and heat it in the winter. That's because unlike a furnace, a heat pump doesn't burn fuel to make heat. It uses electricity to move heat from one place to another.

The XB10 has a SEER (Seasonal Energy Efficiency Ratio) rating of 10.00. And, it carries an HSPF (Heating Seasonal Performance Factor) of up to 8.05.

Made To Withstand The Test Of Time.

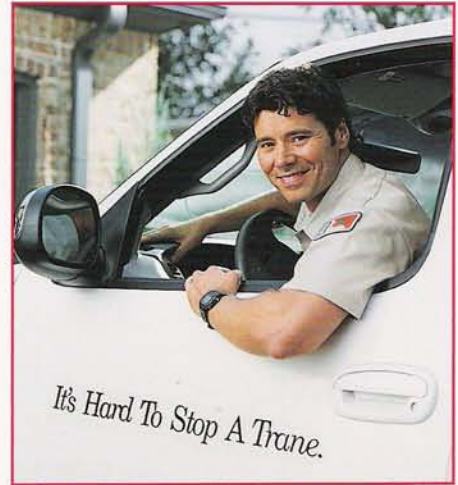

Start with Trane's exclusive Climatuff® compressor, Spine Fin™ coil, and 5-year parts limited warranties. Add other special features like baked-on powder paint on louvers and fan grille, corrosion resistant fasteners, easy-to-service braze fittings, full-sided louvered panels and compact design. These components are smoothly integrated into one durable package that will work efficiently for years to come.

Service Is A Snap.

All electrical and refrigeration controls are located in the same area. Same-side service means easy installation and time-saving service calls. And, corner connections make replacement easy for your installer. Also, louvered panels remove for easy cleaning.

Features That Spell Reliability, Durability And Efficiency.

- Baked-on powder paint on louvers and fan grille
- Corrosion resistant fasteners
- Non-corrosive basepan
- Full-sided louvered panels
- Climatuff® compressor
- Spine Fin™ coil
- 5-year limited warranty on compressor and coil
- 5-year limited warranty on internal functional parts
- Optional extended warranties available

Your Trane Dealer Is Specially Trained.

When buying a heat pump system, selecting the right size is crucial. A unit that's too small lacks the capacity to give you the comfort you want. A unit that is too large costs more to buy and when it short cycles, costs more to operate.

Your local Trane Comfort Specialist™ dealer has been trained to help you select the right XB10 for your home.

XB10 HEAT PUMP

MODEL	NOMINAL TONNAGE	HEIGHT (IN.)	WIDTH (IN.)	DEPTH (IN.)
